

## ENVIRONMENTAL POLICY STATEMENT

The management and all who work at IMS Ltd are committed to the care of the environment and the prevention of pollution.

The organisation ensures that all its activities are carried out in conformance with the relevant environmental legislation.

The organisation has a continuing commitment to:

- Work towards suitable environmental objectives and targets via waste minimisation, recycling promotion, reduction of energy consumption and reducing harmful emissions
- Compliance with the current environmental legal requirements
- Work with suppliers who have sound environmental policies
- Protect and enhance the natural environment

An essential feature of the environmental management system is a commitment to improving environmental performance. This is achieved by setting annual environmental improvement objectives and targets which are regularly monitored and reviewed. The objectives and targets are publicised throughout the organisation and all staff are responsible for their achievement.

In order to ensure the achievement of the above commitments, the organisation has implemented an environmental management system via the Environmental Management Manual which satisfies the requirements of BS EN ISO 14001:2004 (Reviewed and confirmed in 2008).

This policy is a summary of the manual. The obligations and responsibilities required by the environmental management system have been communicated to all employees. The policy and manual is available to the public on request.
